

VirusInfo module for XOOPS2 - Modules

NEWS\_PDF\_AUTHOR: rogiern

NEWS\_PDF\_DATE: 2003/7/22 6:19:15

Hi, I've created a VirusInfo module for XOOPS2. This module will show information on viruses. Currently this is under construction. One block is finished, and showing geographical information on viruses. The blocks and this module are powered by PandaSoft (<http://www.pandasoft.com>). I have no relation with Pandasoft, but thought it was a nice idea to be able to include this kind of information in a portal.

Keep looking at the download-modules page at <http://portal.tequila.fortytwo.nl/portal/> to get the latest version. Please keep me posted of your thoughts on this idea...
