C-JAY Content 2.5 WYSWYG edition BETA - Modules

NEWS_PDF_AUTHOR: forlon

NEWS_PDF_DATE: 2003/7/29 16:07:03

Hi Xoopers,

i am glad that I can announce that you can download a new beta of C-Jay Content on my Website. This version of C-JAY Content contains a WYSWYG editor what is a great improvement in my eyes.
You can get it [here](#).

Since this is a beta version, I did not completly test it. I developed it on IIS but it should work on apache without problems since I can not remember to have some IIS specific stuff in it.
In order to install it you can just replace the files of previous versions. Be sure to update the module after that.

Please report any bugs and stuff to the Beta forum. You can reach it here:
