[SmartWare](#) is the site of the SmartWare column of Mensa International Journal. I tried PHP-Nuke - got hacked. I tried PostNuke - it didn't work at all.

I love Xoops! Visit for a few mp3's, reviews of software (much of it webdesign/promotion-related), hardware & books + more. Want to see a picture taken with the new Nokia 7650? Come on in to [SmartWare](#) 😊
