

Version 0.06 of VirusInfo module released - Modules

NEWS\_PDF\_AUTHOR: rogiern

NEWS\_PDF\_DATE: 2003/8/20 16:10:05

Hi,  
I've written version 0.06 of the VirusInfo module. The changes since the last version (0.01) are that I've now included four blocks in the code, added a nice icon to the module, and changed the layout of the VirusInfo page. The new blocks show Top virus threats, an Alert monitor, and virus news. You can download the file at:

<http://portal.tequila.fortytwo.nl/modules/mydownloads/visit.php?lid=1>

Have fun with it,

rogiern
