C-JAY Content 2.5 (WYSWYG edition) - Modules

NEWS_PDF_AUTHOR: forlon

NEWS_PDF_DATE: 2003/8/26 9:15:05

I am proud to announce that C-Jay Content 2.5 is final now.

You can download it at http://c-jay.net.

At the moment I am working on a complete tutorial and the real final version will have the tutorial included. But the module is already functioning.

The main features are:
Wrap HTML pages into xoops
Wrap PHP pages into xoops
Upload files through the module (no need of ftp)
create new HTML pages with the included wyswyg editor **(new)**
create new PHP pages with the included code editor
wrapped HTML and PHP pages are searchable within xoops
edit wraped HTML pages with the wyswyg editor **(new)**
edit wraped PHP pages with the code editor **(new)**
create links to wraped pages either inside it's own block or inside the main menu
Organize you links inside the block with headlines **(new)**

You have to change the following permissions on the server:
Content Folder 777
Admin Folder 777
Inside Admin:
code_ide 777
tmp_ide.htm 777
tmp_ide.php 777
ide.php.conf 777

Support is only given at http://c-jay.net **.**
