XoopsChat V 1.2

New PREVIEW-Version!

- + Admin can create numerous chatrooms
 - + Groupaccess function for chatrooms
 - + Members can be banished from chat
 - + Shoutbox inclusive
 - + Private chat with ONE member is possible
 - + Invitation to private chats can be denied
 - + Various options (wordwrap-function for Shoutbox, disallow HTML etc.)
-
- Works only with register_globals ON
 - Guest are NOT allowed to use Shoutbox or chat
 - No templates

All problemes marked with "-" will be solved in the next version! This version is not bugfree but working quite stable. Important: Before installation read the Readme.txt for apologies 😊 and installation hints.

@Translators of Xoops Chat: I took the translations from the CVS version, but for the spanish / dutch / italian / french language files you have to do some translations again. Sorry for the inconvenience.

Have fun/success with this new chatversion
