Modularised PhpSysInfo For Xoops - Modules

NEWS_PDF_AUTHOR: anggarda

NEWS_PDF_DATE: 2003/9/18 20:51:31

Good Day, Xoops.org.

As the subject matter, I've modularised phpsysinfo for xoops.

This is my first attempt at creating a module after having pick up php for a few days.

This module is based on the "How to create a module" available at the xoops wiki. I wasn't able to get the smarty template working as the wiki lack the necessary documentation.

Therefore please be tolerant of any inadequacies which may exist in the module and revert back to myself on bugs or suggestions.

You may wish to preview the module or download it.

Regards.
